RISK FACTORS AND OTHER INFORMATION

I. GENERAL RISK WARNING

The price of securities as a result of market conditions fluctuates, and any individual security may experience upward or downward movement, and may even become valueless. There is a risk that losses may be incurred rather than profit made as a result of buying and selling of securities.

Past performance is not a guide to future performance.

An investor deals in a range of investments of which may carry a different level of risk. There is an extra risk of losing money when securities are bought from smaller companies. There may be a big difference between the buying price and the selling price of these securities.

II. PRUDENCE REQUIRED

This risk disclosure does not purport to disclose all the risks and other significant aspects of investing in these securities. An investor should undertake his or her own research and study on the trading of securities before commencing any trading activity. He/she may request information on the securities and issuer thereof from the Commission which are available to the public.

III. PROFESSIONAL ADVICE

The investor should seek professional advice if he or she is uncertain of, or has not understood any aspect of the securities to invest in or the nature of risks involved in trading of securities especially the high-risk securities.

RISK FACTORS

Potential investors should read thoroughly all information contained in this Prospectus and/or other Fund related documents available before making any investment decisions. He or she should carefully consider all investment risks, fees, and/or other factors detailed in these documents to make certain whether the Fund's nature is appropriate for his or her investment profile and objective.

Various risk factors can affect the market value of the assets of the Fund and cause the Fund's net asset value to vary. Consequently, the returns of the Fund are not guaranteed and there is a risk that a Fund might not achieve its investment objectives.

The major risk factors facing the Fund are listed by order of importance below:

MARKET RISK is the risk of change in the value/price of financial instruments from fluctuation in foreign exchange rates (currency risk), market interest rates (interest rate risk) and market prices (price risk). The Fund's investments in equity securities may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries, or companies within those markets. Historically, the markets have moved in cycles and the value of the Fund's securities and other financial instruments may move drastically up or down from day to day. The risk can be minimized by following the exposure limits set in this prospectus or by the Commission.

LIQUIDITY RISK (also called funding risk) is the risk that the Fund will encounter difficulty in raising funds within a reasonable time to meet short term financial demands. The Fund may not be able to generate enough cash to pay for the redemptions within the normal 7-day period. The risk can be minimized by placing a liquidity contingency plan that will provide a framework for addressing liquidity crisis situations.

The following are additional risks present in managing the Fund:

- Investment companies/mutual funds are neither insured with the Philippine Deposit Insurance Corporation (PDIC) nor any other agency of the government, nor guaranteed by the Fund Manager. Investors are advised to read the prospectus of the Fund before deciding to invest.
- Investors are exposed to the risk of dilution since other investors may subscribe to any amount of shares of the Fund. The influence that the investors can exert over the control and management of the Fund decreases proportionately.

The above risk factors are by no means all-inclusive. New and/or unidentified risks may arise any time given the dynamic financial markets and economic environment.

Notwithstanding this general requirement, a Philippine corporation may retain all or any portion of such surplus when (i) justified by definite corporate expansion projects or programs approved by the Board of Directors; or (ii) when the corporation is prohibited under any loan agreement with any financial institution or creditor, whether local or foreign, from declaring dividends without its/ his consent, and such consent has not yet been secured; or (iii) when it can clearly be shown that such retention is necessary under special circumstances obtaining in the corporation, such as when there is need for special reserve for probable contingencies.
