PART II -COMPANY PROFILE

Brief Description of the General Nature and Scope of Business of the Company

The registrant is a stock corporation incorporated on March 1, 2018. It appointed First Metro Asset Management, Inc. (FAMI) as principal distributor of its shares of stock and will not sell or agree to sell any shares of its capital stock except through FAMI.

As of December 31, 2019, the registrant's total sales were ₱458.94 million. This is the main source of the company's revenues for the year.

FAMI'S marketing strategy will be based on the strategic partnership of CEAP, Marist and First Metro Investment Corp. FAMI will capitalize on the endorsement of the CEAP in order to educate the teachers on the concept of savings and mutual fund investing. The CEAP membership composed of over 20,000 teachers will be a primary source of retail investors. This competitive advantage will be further strengthened by FMIC's good track record, market experience and credibility, and position as the largest investment bank and backed-up by the largest universal bank in the country.

FAMI has set up a marketing network and accredits sub-distributors or agents to sell the shares. Accredited sub-distributors or agents are directly liable to FAMI.

FAMI will likewise capitalize on its relationships with the companies under the Metrobank Group. The group, with its total employee force of over 14,000 will be an excellent source of retail investors and referrals to high net-worth individuals. The corporations under the group are potential sources of institutional funds that will enable the FAMI mutual funds to attain critical mass at a faster pace.

Competition

The competitive environment for the company's products includes not only the products and services offered by the other Mutual Fund players, but all other investment instruments that the Company's target market has access to.

The registrant's main competitors are the other mutual funds in the Dollar Bond Fund category of Philippine mutual funds. It considers the dollar bond funds of BPI and ATRAM, as its main competitors. As of December 31, 2020, these two competitor Funds represent around 87.27% of the total dollar bond funds sector. The company will be competing initially in terms of return on investment (ROI) and later on in terms of Fund size.

Major Risks Involved

Potential investors should read thoroughly all information contained in this Prospectus and/or other Fund related documents available before making any investment decisions. He or she should carefully consider all investment risks, fees, and/or other factors detailed in these documents to make certain whether the Fund's nature is appropriate for his or her investment profile and objective.

Various risk factors can affect the market value of the assets of the Fund and cause the Fund's net asset value to vary. Consequently, the returns of the Fund are not guaranteed and there is a risk that a Fund might not achieve its investment objectives.

The major risk factors facing the Fund are listed by order of importance below:

MARKET RISK is the risk of change in the value/price of financial instruments from fluctuation in foreign exchange rates (currency risk), market interest rates (interest rate risk) and market prices (price risk). The Fund's investments may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries, or companies within those markets. Historically, the markets have moved in cycles and the value of the Fund's securities and other financial instruments may move up or down from day to day. The risk can be minimized by following the exposure limits set in this prospectus or by the Commission.

LIQUIDITY RISK (also called funding risk) is the risk that the Fund will encounter difficulty in raising funds within a reasonable time to meet short term financial demands. The Fund may not be able to generate enough cash to pay for the redemptions within the normal 7-day period. The risk can be minimized by placing a liquidity contingency plan that will provide a framework for addressing liquidity crisis situations.

CREDIT RISK (also called default risk) is the risk that the issuer of the security will be unable to make the required payments on their debt obligations. The Fund invests in government securities, the risk of default of which is considered minimal. The Fund manages credit risks by transacting with accredited counterparties only. Credit exposures are closely monitored to ensure that payments are made on time.

The following are additional risks present in managing the Fund:

- Investment companies/mutual funds are neither insured with the Philippine Deposit Insurance Corporation (PDIC) nor any other agency of the government, nor guaranteed by the Fund Manager. Investors are advised to read the prospectus of the Fund before deciding to invest.
- Investors are exposed to the risk of dilution since other investors may subscribe to any amount of shares of the Fund. The influence that the investors can exert over the control and management of the Fund decreases proportionately.

The above risk factors are by no means all-inclusive. New and/or unidentified risks may arise any time given the dynamic financial markets and economic environment.

The ability of the Fund to declare dividends therefore will be restricted by the amount of yearly net income generated.
