**MARKET COMMENTARY**

**PSEi : 6,693.83, YTD : -6.25%**

PSEi saw selling pressure down by 141.09 points or 2.06% to a level of 6,693.83 due to weaker peso, Fitch outlook downgrade on PH and detected cases of Delta variant. All sectors ended for the week on a weak note: Conglomerates (-2.77%), Properties (-2.85%), Mining (-0.47%), Services (-0.63%), Industrials (-2.08%) and Banks (-1.63%). Foreign investors were net sellers of \$58M this week.

OFW remittances rose by 13.1 percent to \$2.382 billion in May 2021. This was due to the 16.2 percent and 2.7 percent increase in receipts from land-based workers to \$1.894 billion from \$1.631 billion and sea-based workers to \$488 million from \$475 million. On a year-to-date basis, cash remittances from January to May reached \$12.28 billion, 6.3 percent higher than \$11.554 billion in 2020.

Foreign Direct Investment (FDI) net inflows more than doubled (+114%) year-on-year to \$679 million. This brought the foreign direct investment net inflows for the first four months of 2021 to \$3.1 billion—a 56.3-percent increase from \$2 billion in the comparable period last year.

Market is set to trade within a narrow 6500-6720 range in the near term but is seen to remain with a downward bias due to the uncertainties on the Delta variant. The possibility of reverting back to some stricter quarantine measures may weigh down sentiment as this could derail the bounce back of the economy.
