## MARKET COMMENTARY

**PSEi :** 7011.11 | **YTD :** -1.57%

PSEI pulled down (-1.57%, week-on-week, 7,011) on the continuous surge in COVID cases in the country. Market sentiment was exacerbated with potential upgrade of restriction to Alert Level 4, just as quickly as the government raised nearby provinces to Alert Level 3. Majority of the sectors ended the week on a weak note: Holdings (+0.57%), Properties (-4.69%), Mining (-0.80%), Services (-2.25%), Industrials (-2.82%) and Banks (-1.50%). Foreign investors were net sellers of \$6.81M this week.

The Philippines' inflation rate for the entire 2021 hits 4.5% beyond the government's target range of 2% to 4%. Prices of goods rose at a much faster pace in 2021 than what the government aimed for, as Filipinos struggled to make ends meet amid the coronavirus crisis. The Philippine Statistics Authority on Wednesday, January 5 reported that inflation for the entire 2021 hit 4.5% driven mainly by higher food prices.

Unemployment rate last November 2021 improved to 6.5% from October's 7.4%. This is also the lowest since January 2021. Equivalent number of unemployed persons totaled 3.16M. The labor force participation rate (LFPR) in November 2021 was estimated at 64.2% translating to 48.64 million individuals aged 15 years old and above who were either employed or unemployed.

PSEi held above the key 7,000 support after retesting thrice last week and even touching the critical 7,000 mark last Friday to hit an intra-day low of 6,978. We expect this week o trade within range with downward bias as new infections reach 33,169 with positivity rate of 46%.
