## **PART II -COMPANY PROFILE**

### **Brief Description of the General Nature and Scope of Business of the Company**

The First Metro Philippine Equity Exchange Traded Fund, Inc. (the Fund) was registered with the Securities and Exchange Commission (“SEC”) on January 15, 2013 as an open-end investment company under Republic Act No. 2629, otherwise known as the Investment Company Act and as an “Exchange Traded Fund” (“ETF”) under SEC Memorandum Circular No. 10, Series of 2012 otherwise known as the SEC Rules and Regulations on Exchange Traded Funds (the “SEC ETF Rules”). The Fund is engaged primarily in the business of investing, reinvesting, and trading in, and issuing and redeeming its shares of stock in creation units in exchange for a basket of securities representing an index.

As a licensed ETF, it offers to and through qualified trading participants (the “Authorized Participants”), on a continuous basis, shares in the Fund which are issuable and redeemable in creation units. The Board approved during its meeting on December 11, 2015, the reduction of the number of shares comprising one creation unit from 200,000 to 50,000 shares. Shares of the Fund may be directly redeemed in exceptional circumstances as approved by the SEC. In December 13, 2016, the Board approved to reduce further the number of shares per creation unit from 50,000 to 10,000 shares. Shares of the Fund may be directly redeemed in exceptional circumstances as approved by the SEC.

The Fund aims to provide returns which would reflect the performance of the Philippine equities market by investing in a basket of securities which are included in the PSEi of the PSE (the “Underlying Index”). The portfolio of the Fund is to be rebalanced and reconstituted every six (6) months in order to adjust to the current composition of the PSEi. Price volatility of the constituent shares of stock can affect the market value of the assets of the Fund and cause the Fund’s Net Asset Value (“NAV”) to vary.

The Fund is the only mutual fund traded on the Philippine Stock Exchange (PSE) and the shares of the Fund is listed on the ETF Board of the PSE. The shares of the Fund may be bought and sold on the secondary market at the quoted market price in the PSE through the Trading Participants of the PSE which may require payment of brokerage commissions, stock transaction tax and/or other fees and charges (e.g. clearing house fees). However, shares of the Fund may be issued and redeemed only through Authorized Participants in creation units. Investors who are interested in creating or redeeming shares in creation units may contact any one of the Authorized Participants or request his or her existing registered broker/Trading Participant to place such an order with any of the Authorized Participants. Interested investors should be aware that the Authorized Participants and the Trading Participants are required to comply with Philippine general laws, rules and regulations including any “know-your-customer” requirements under existing regulations.

First Metro Investment Corporation (First Metro) is the Fund Sponsor. As Fund Sponsor, First Metro organized the Fund and has provided the initial capital of the Fund totaling P750 million.

The product being sold by the Fund is its shares of stock, being a mutual fund company. As of December 31, 2021, the registrant’s total sales were P260.61 million.

### **Compliance with the Manual on Corporate Governance**

The Board approved the Fund’s Corporate Governance Manual on June 19, 2013 to monitor and assess the level of the Fund’s compliance with leading practices on good corporate governance as specified in Philippine SEC Circulars. Aside from establishing specialized committees to aid in complying with the principles of good corporate governance, the Manual also outlines specific investor’s rights and protections and enumerates particular duties expected from the Fund’s Board members, officers and employees. It also features a Disclosure System which highlights adherence to

the principles of transparency, accountability and fairness. A Compliance Officer is tasked with the formulation of specific measures to determine the level of compliance with the Manual by the Fund's Board members, officers and employees. To date, the Fund has not encountered any deviation from the Manual's standards.

## **Risk Factors**

Various risk factors can affect the market value of the assets of the Fund and cause the Fund's net asset value to vary. Consequently, there are instances when redemption prices of redeemed shares may be less than the prices at which the shares were originally purchased. Investors who redeem their shares during this time may not recover the full cost of their investment.

The Fund has identified the following major risks involving each of its businesses and other operations:

**Market Risk.** The Fund's investments in equity securities may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries or companies within those markets. The value of a security may decline due to general economic and market conditions which are not specifically related to a particular issuer, such as real or perceived adverse economic conditions or changes in interest or currency rates. Fluctuations in the value of securities in which the Fund invests will cause the NAV of the Fund to fluctuate. Historically, the markets have moved in cycles, and the value of the Fund's securities and other financial instruments may fluctuate drastically from day to day.

**Stock Market Risk.** Investing in shares of stock is generally riskier than investing in fixed-income securities, hence investors' money or principal may even be lost. The risks inherent to equity ETFs are related to the volatility of the stock market. Changes in prices of equity securities that compose the Fund's investment portfolio may substantially vary in a short span of time. The performance of the companies whose shares are included in the portfolio of the Fund is very much dependent on the people behind those companies. Added to that, stock prices are sensitive to political and economic conditions that normally change from time to time.

**Index Risk.** The Fund is subject to the risk that the Underlying Index may underperform other segments of the equity market or the equity market as a whole.

The Fund aims to track the PSEi, which is rebalanced every six (6) months. The returns of the Fund may be affected by such rebalancing, and the Fund is subject to the risk that it may not accurately track the returns of the PSEi.

**Liquidity Risk.** Although the Underlying Index shall be comprised of securities included in the main index of the PSE, in certain circumstances, it may be difficult for the Fund to purchase and sell particular investments within a reasonable time at a fair price. In addition, the ability to assign an accurate daily value to certain investments may be difficult, and the Fund Manager may be required to fair value the investments.

**Tracking Error Risk.** The tracking error is the divergence of the Fund's performance from that of the index it tracks. Tracking error may occur because of differences between the securities held in the Fund's portfolio and those included in the index, pricing differences, transaction costs, the Fund's holding of cash, differences in timing of the accrual of dividends, changes to the Underlying Index or the need to meet various new or existing regulatory requirements. This risk may be heightened during times of increased market volatility or other unusual market conditions. Tracking error also may result because the Fund incurs fees and expenses, while the index it tracks does not.

**Early Closing Risk.** An unanticipated early closing of the PSE may result in a shareholder's inability to buy or sell shares of the Fund on that day.

**Trading Halt Risk.** Secondary market trading in the shares of the Fund may be halted or suspended by the PSE because of market conditions or other reasons. If a trading halt or suspension occurs, a shareholder may temporarily be unable to purchase or sell shares of the Fund.

**Trading Risk.** Shares may trade below their NAV. The NAV of the shares of the Fund will fluctuate with changes in the market value of the Fund's holdings. In addition, although the shares of the Fund are listed on the PSE, there can be no assurance that an active trading market for shares of the Fund will develop or be maintained.

The Philippine securities markets are substantially smaller, less liquid, and more volatile relative to major securities markets in the U.S. and other jurisdictions, and may not be as highly regulated or supervised as some of these other markets. The NAVPS of the shares when issued, may differ significantly from the price at which the shares will trade on the PSE.

**Interest Rate Risk.** Interest rate movements may have direct impact on the prices of assets of the Fund. Some assets are more sensitive to changes in interest rates while other assets may not. It is expected that interest rate movements may have negative influence of the Fund's assets.

**Inflation Risk.** Inflation risk is the risk that inflation may erode the real value of an investment by the Fund.

**Non-Diversification Risk.** The Fund is considered non-diversified and can invest a greater portion of its assets in securities of individual issuers than a diversified fund. As a result, changes in the market value of a single security could cause greater fluctuations in the value of the shares of the Fund than would occur in a diversified fund.

**Passive Investment Risk.** The Fund is not actively managed and the Fund Manager does not attempt to take defensive positions in declining markets. Therefore, the Fund may be subject to greater losses in a declining market compared to a fund that is actively managed.

**Absence of Operating History.** The Fund is a start-up company and may also be affected by risks associated with companies that do not have operating histories. However, people and companies behind the Fund have actual experience and a track record in mutual funds and other financial institutions.

The investors should be aware that their investment in exchange traded funds is not guaranteed by the Philippine Deposit Insurance Corporation. The Fund Manager is also not permitted by law to guarantee any yield to the investors of the Fund.

**Risk of Dilution.** Because the Fund is an Open-end Investment Company, investors may effectively subscribe to any amount of Shares of the Fund. As such, investors face the risk of the percentage of their stockholding in the Fund being diluted as more investors subscribe to the Shares. The influence that the investors can exert over the control and management of the Fund decreases proportionally.

**Geographic Concentration Risk.** The Fund's investments are primarily in shares of stock of publicly listed domestic corporations. Funds that are less diversified across countries or geographic regions are generally riskier than more geographically diversified funds. A fund that focuses on a single country or a specific region is more exposed to that country's or region's

economic cycles, currency exchange rates, stock market valuations and political risks, among others, compared with a more geographically diversified fund.

**Delay in Issuance of ETF Shares Risk.** In the event that the authorized capital stock of the Fund has been fully subscribed, the Fund will have to apply for an increase in its authorized capital stock with the SEC in order to accommodate additional creation orders. Due to the corporate actions and regulatory approvals that have to be complied with to increase the authorized capital stock of the Fund, there may be a delay in delivery of the Shares of the Fund to Authorized Participants which made such creation orders.

**Securities Lending Risk.** The Fund bears the risk of loss of investing cash collateral and may be required to make payments to a borrower upon return of loaned securities if invested collateral has declined in value. Furthermore, because of the risks in delay of recovery, the Fund may lose the opportunity to sell the securities at a desirable price, and it may not have the right to vote securities while they are being loaned.

**Regulation and Taxation Risk.** The Fund is subject to a number of national and local laws and regulations. These include industry laws and regulations relating to investment and publicly-owned companies, the PSE and applicable taxes. The Fund cannot assure prospective investors that changes in laws or regulations, including those related to investment and publicly-owned companies, the PSE and applicable taxes, will not result in the Fund or the investors in the Fund having to incur substantial additional expenditures in relation to the Fund's investments or investments in the Fund.

**Risks Relating to the Philippines.** Substantially all of the Fund's Component Securities are shares of companies based in the Philippines, which exposes the Fund to the risks associated with the country, including the performance of the Philippine economy. Factors that may adversely affect the Philippine economy include: (1) decreases in business, industrial, manufacturing or financial activities in the Philippines, the Southeast Asian region or globally; (2) scarcity of credit or other financing, resulting in lower demand for products and services provided by companies in the Philippines, the Southeast Asian region or globally; (3) exchange rate fluctuations; (4) inflation or increases in interest rates; (5) levels of employment, consumer confidence and income; (6) changes in the Philippine government's fiscal and regulatory policies; (7) re-emergence of SARS, avian influenza (commonly known as bird flu), or H1N1, or the emergence of another similar disease in the Philippines or in other countries in Southeast Asia; (8) natural disasters, including but not limited to tsunamis, typhoons, earthquakes, floods, fires and similar events; (9) political instability, terrorism or military conflict in the Philippines, other countries in the region or globally; and (10) other social, political or economic developments in or affecting the Philippines. There can be no assurance that the Philippines will achieve strong economic fundamentals in the future. Changes in the conditions of the Philippine economy could materially and adversely affect the performance of the Fund.

**Dependence on the Services of Third Parties.** The Fund relies on the services of third parties such as the Authorized Participants, Principal Distributor, Fund Manager, Custodian, Stock and Transfer Agent, and INAV Calculator, among others, to run its operations. The loss of services of any of these third parties could materially impair the Fund's operations and performance, and the Fund may not immediately be able to replace such third party within a reasonable period of time, which could materially and adversely affect the Fund's operations and performance.

The Fund also relies on the PDTC as the securities depository of its shares. The PDTC may determine to discontinue providing its service with respect to the shares at any time by giving notice to the Fund, the Fund Manager, the Custodian and the Fund Sponsor and discharging its responsibilities with respect thereto under applicable law. Under such circumstances, the Fund, the Fund Manager and Principal Distributor, the Custodian and/or the Fund Sponsor shall take

action either to find a replacement for the PDTC to perform its functions at a comparable cost or, if such a replacement is unavailable, to terminate the Fund.
