## MARKET UPDATE

The PSEi broke its 4 -month win streak in March with a $-0.6 \%$ drop MoM as foreigners turned net sellers amid FTSE quarterly rebalancing. Nonetheless, with a YTD gain of $7.03 \%$, the PSEi remains as one of the outperformers in the region.

On the local front, inflation picked up for the first time in 5 months to $3.4 \%$ YoY in February, accelerating from 2.8\% in January and above consensus of $3 \%$ boosted by higher food and oil prices. BSP Governor Remolona ruled out the possibility of a rate cut within the first half of the year, saying such a policy move is "too soon" with El Nino and wage hike risks still present. Similarly in the U.S., investors continued to reassess rate cut expectations, following Fed Chair Powell's statement that the Fed was in no rush to cut rates.

All sectors ended in the red except Services (5.30\%) lifted by the gains in CNVRG (10.67\%) and ICT (10.03\%). On the other hand, $\mathrm{M} \& \mathrm{O}$ plunged the most by $-4.55 \%$ followed by Industrials ($2.59 \%$ ). With sticky inflation and "high-for-longer" monetary policy outlook, we expected the local bourse to remain challenged in the first half of 2024.
